Experiment -1.3

Student Name: Yash Dwivedi
UID: 22BDO10019
Branch: AIT-CSE(DevOps)
Section/Group: 22BCD-1/A
Semester: 4th
Date of Performance: 31/01/2024
Subject Name: Git and Hub
Subject Code: 22CSH-293

1. **Aim/Overview of the practical:** To create and explore pull requests.

2. **Software Used:** Git Bash, GitHub.

3. **Steps for experiment/practical:**

- ❖ Create or clone a repository on your local machine and open GIT BASH.
- ❖ Move to the directory using the **cd** command.

$ cd tempestYash
```

- ❖ Create a file in the master or main branch , eg , **file1.c** and add some text to the file.

- Add the file to the staging area using **git add** and then commit the changes using the **git commit** command.

```
yashd@Tempestation MINGW64 /f/Git Practicals/Exp3/t

$ git commit -m "Wrote hello world"
[master 13760a6] Wrote hello world

 create mode 100644 file1.c
```

- Create a new branch and checkout to it using the **git checkout -b** command , eg , **test**.
- Open the **file1.c** on the **vi** editor and make some changes in it.

```
#include <stdio.h>

int main() {
        printf("Hello world");
}
```

(master)

```
#include <stdio.h>

int main() {
        printf("Yash Dwivedi");
}
```

(test)

- Repeat step 4 again.

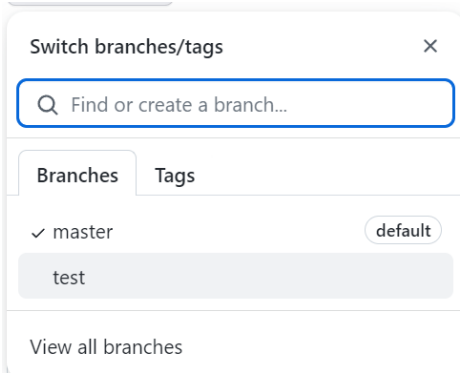
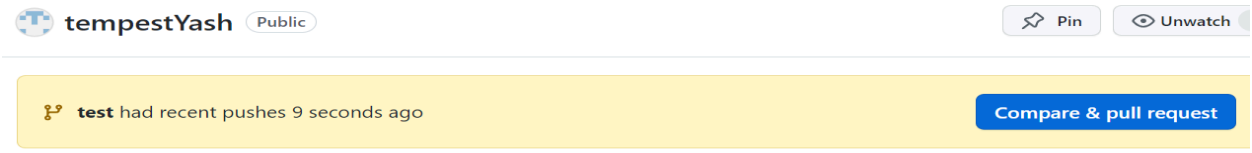
- Now, Go to github, open the repository and move to the **test** branch and make some changes in a file.



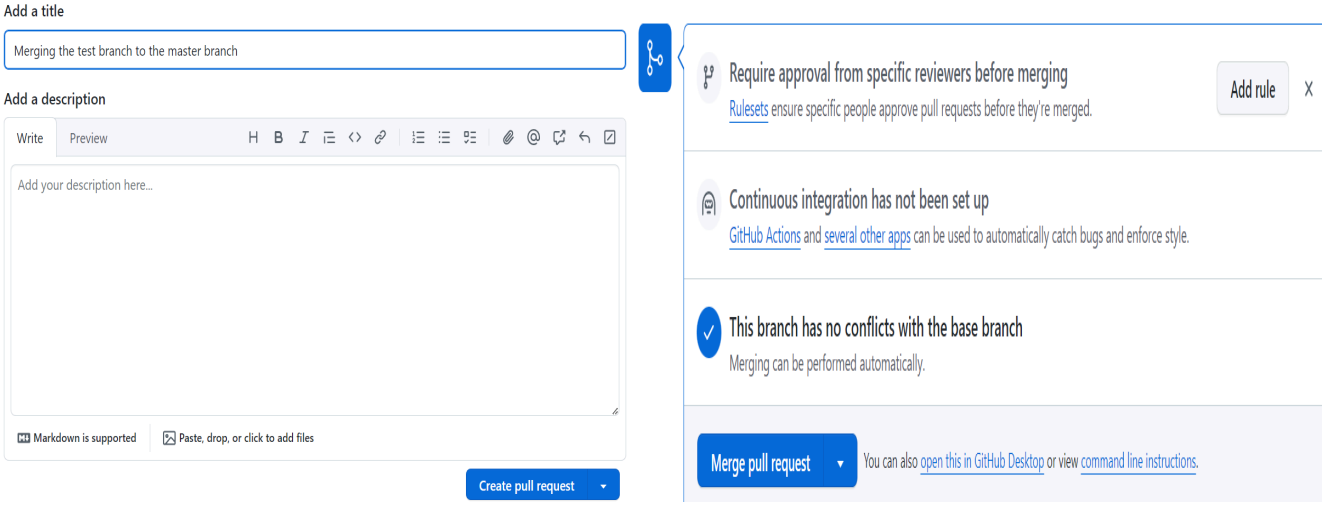
```c
#include <stdio.h>

int main() {
        printf("Yash Dwivedi is in 22BCD-1");
        return 0 ;
}
```

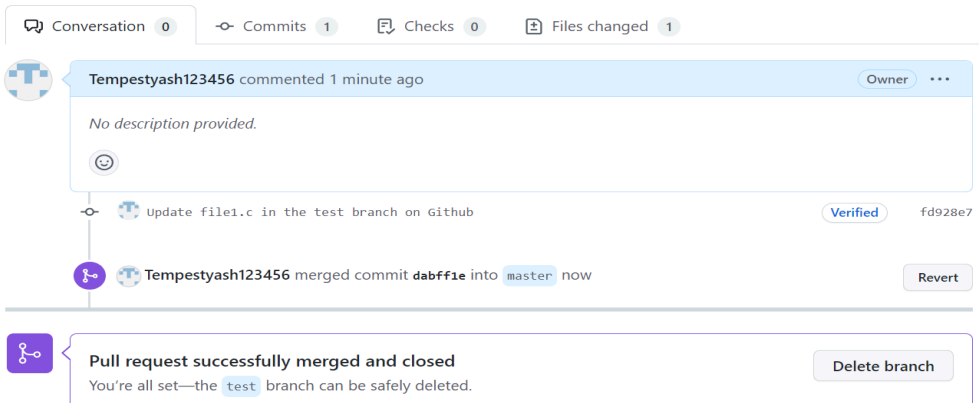
❖ Commit the changes and move to the **master** branch. Click on the **Compare & Pull request**.



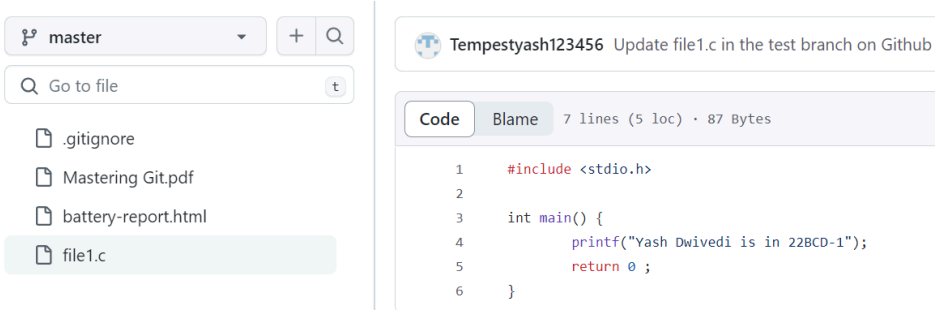
❖ **Create the pull request,** resolve the merge conflicts (if any) and then **merge pull request**.



❖ After the merging, you may choose to delete your branch , i.e , **test**



❖ The master branch will now be reflecting the changes.



❖ In the Git Bash, you may get the changes in your local repository using the **git pull** command and if you want the references of the commits, use **git fetch**.

```

4. Result/Output/Writing Summary:

In this experiment, we have created and explored the pull requests. We have created a new branch, made some changes in the files in that new branch and then merged the changes with the main branch by resolving merge conflicts by using both GitHub and Git Bash.

Learning outcomes (What I have learnt):

1. Learnt how to create a branch.

2. Learnt how to push the changes to the remote repository.

3. Learnt how to pull the changes from the remote repository.

4. Learnt to merge two branches.

5. Learnt how to resolve merge conflicts.

Evaluation Grid (To be created as per the SOP and Assessment guidelines by the faculty):

Sr. No.	Parameters	Marks Obtained	Maximum Marks
